

Both hand washing and machine cleaning!
Rust and dirt are removed just by applying!

「Nice Brite」

Nice Brite is a biodegradable bio-cleaning agent that is friendly to people and the environment.

Developed to remove rust stains in railway stainless steel vehicles and painted vehicles. It is low cost and quickly decomposes and removes any stubborn dirt to regain the original shine of the material.

Glass, aluminum, rubber, and sealing agents are basically not hurt, so you can use them with confidence. Both hand washing and machine cleaning can be handled, and workability is excellent.

Neutral bio agent selected with
overwhelming cleaning power and high stability

「Neutra Clean」

The bio-cleaning agent "NutraClean" has the cleaning power to overturn the image of conventional neutral detergents, and has been newly developed as a neutral bio-cleaning agent that is considerate of people and the environment.

In particular, it demonstrates its power against stubborn carbon dirt and dust, and can be widely used for immersion cleaning and hand washing.

In addition, there is no smell, and it can be used safely in the car and indoors. After washing, it drains well and does not leave any stains. Please use it for various things such as metal, glass, rubber, FRP, etc.
